

Natural Gas Conversion Kit

Suitable for most domestic barbeques up to 6 burners and side burner

Part Number: NGCK 9

3/8" SAE Female hose connected to gas appliance regulator AGA 5862 plus fitted with a 1.5 metre stainless steel hose and male bayonet plus ball valve

Please Note:

- All work must be carried out by an authorised person in accordance with the Australian Gas Installation Standard AS/NZS 5601.
- All joints must be leak tested prior to use.
- This natural gas conversion kit is suitable for barbeques up to 6 burners and side burner
- Replacement gas jets (injectors) are not included in this conversion kit. The authorised person must consult with the appliance manufacturer to ensure the orifice size is correct & approved for the barbeque being converted to natural gas. The fitment of gas jets (injectors) with an incorrect orifice size can result in poor burner performance and can be a safety hazard.

This unit is designed to be connected to an approved female floor socket.

The flexible hose assemblies within the kit are not designed for a permanent outdoor installation and must be installed under protective cover to limit the effects of the weather.

All hose assemblies have a limited lifetime. Regularly check for signs of deterioration. Should any signs of deterioration exist, the assembly must be replaced immediately. It is recommended that this natural conversion kit be replaced after 7 years.

The use of the natural gas conversion kit on BBQ (the appliance) must comply with local statutory and regulatory requirements and conform to the installation requirements of AS/NZS 5601.

If after following the instructions provided, satisfactory performance cannot be obtained, contact the local gas authority for advice and assistance
